

ROOTED IN SECURITY EXPERTS IN CMMC COMPLIANCE

Platform-Guided Assessments, Workflows & Audit Assurance

THE BASICS OF CMMC:

PURPOSE: The primary purpose of CMMC is to protect Controlled Unclassified Information (CUI) and Federal Contract Information (FCI) by enforcing cybersecurity practices across the defense supply chain.

LEVELS OF MATURITY: CMMC defines multiple levels of cybersecurity maturity, ranging from basic to advanced. Levels correspond to specific security practices and processes. Organizations must achieve the required level based on their contract requirements and role in the supply chain.

ASSESSMENTS & CERTIFICATIONS: Organizations must currently self-assess their CMMC readiness. Once CMMC is fully implemented, organization must undergo a CMMC assessment conducted by a CMMC Third-Party Assessment Organization depending on contractual requirements.

DOMAINS & PRACTICES: CMMC Level 1 covers 6 domains and 15 requirements. CMMC Level 2 covers 14 domains and 110 requirements that mandate more sophisticated cyber security defenses including vulnerability management, incident response, security awareness training and more.

CONTINUOUS IMPROVEMENT: CMMC emphasizes continuous improvement and ongoing monitoring. Organizations must maintain their cybersecurity practices to retain their certification.

The Cybersecurity Maturity Model Certification framework was designed to enhance the cybersecurity posture of organizations that work with the US Department of Defense (DoD). CMMC was established to safeguard sensitive information and ensure that contractors and subcontractors in the Defense Industrial Base (DIB) adhere to specific security standards. Adhering to CMMC's requirements can be daunting, especially for small-to-medium businesses (SMBs) trying to navigate CMMC framework complexities while consistently delivering innovations and operations that serve our nation's defense. RADICL can help.

RADICL, a CMMC Registered Provider Organization (RPO), was founded to better protect SMBs in the DIB through enterprise-grade cyberthreat protection and guided CMMC compliance adherence. Protecting the SMBs that serve our nation is RADICL's mission. Vital to an improved security posture is ensuring IT security fundamentals are well in place. CMMC provides a roadmap and framework that when well implemented, significantly improves an organization's cyberthreat resiliency.

RADICL removes the burden of managing the complex and confusing CMMC compliance process. Our Xtended Threat Protection (XTP) Platform and XTP:COMPLY module will guide your organization to success. RADICL XTP provides advanced threat protection and directly meets up to 26 CMMC Level 2 requirement, while ensuring motivated threat actors are deterred, detected, and stopped.

Our goal is simply, keep you truly secure, while ensuring your CMMC compliance mandates are well met, with minimal business interruption and cost, so that you can focus on serving your mission and customers.

TRANSFORMING UNCERTAINTY INTO CLEAR DIRECTION

Here's what RADICL's guided approach to CMMC compliance adherence looks like:

1 COMPLIANCE SCOPE ASSESSMENT

The first thing we will do is meet with your team to understand and validate your compliance requirements and scope. We will strategize what can be done to reduce your in-scope infrastructure / operations to minimize your compliance costs.

2 XTP:COMPLY RADbot AUTO-ASSESSMENT

Once deployed, our automated AI-bot – RADbot will conduct an initial assessment based on your requirements and XTP modules you have purchased. For CMMC Level 2, 26 requirements will be assessed as met once all XTP modules are enabled and operating, getting your compliance off to a fast start.

3 XTP:COMPLY GUIDED SELF-ASSESSMENT

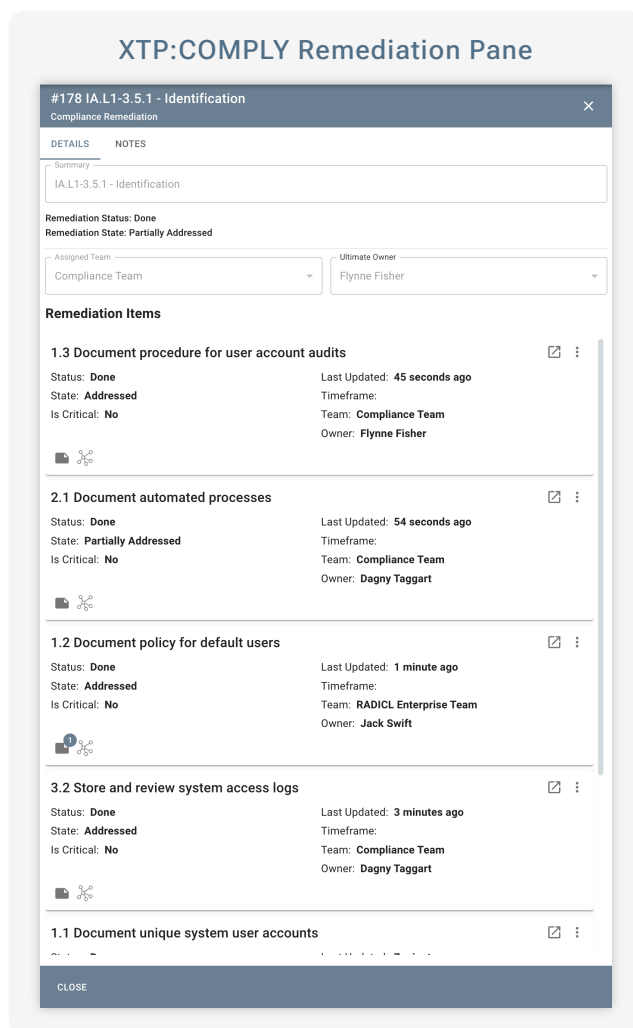

XTP:COMPLY initiates and guides a logical self-assessment process. Each week, new assessment objectives will be rolled out to your team, with expert guidance on how to determine whether you are compliant, or if gaps exist. Notes and evidence are captured along the way.

4 XTP:COMPLY GUIDED REMEDIATIONS

As self-assessments start to complete, XTP:COMPLY will tee-up guided remediation actions based on any identified gaps. Remediations will contain expert guidance on what to do and how to do it. We will do whatever we can to help your team quickly close the gap. Notes and evidence are captured along the way.

5 AUDIT READINESS

Once all remediations have been addressed, you should be well prepared for your audit. XTP:COMPLY will initiate new self-assessments as time passes to ensure your compliance posture is well maintained. When audit time comes, all prior work, notes, and evidence is well organized and maintained ensuring auditors can quickly and efficiently do their work.

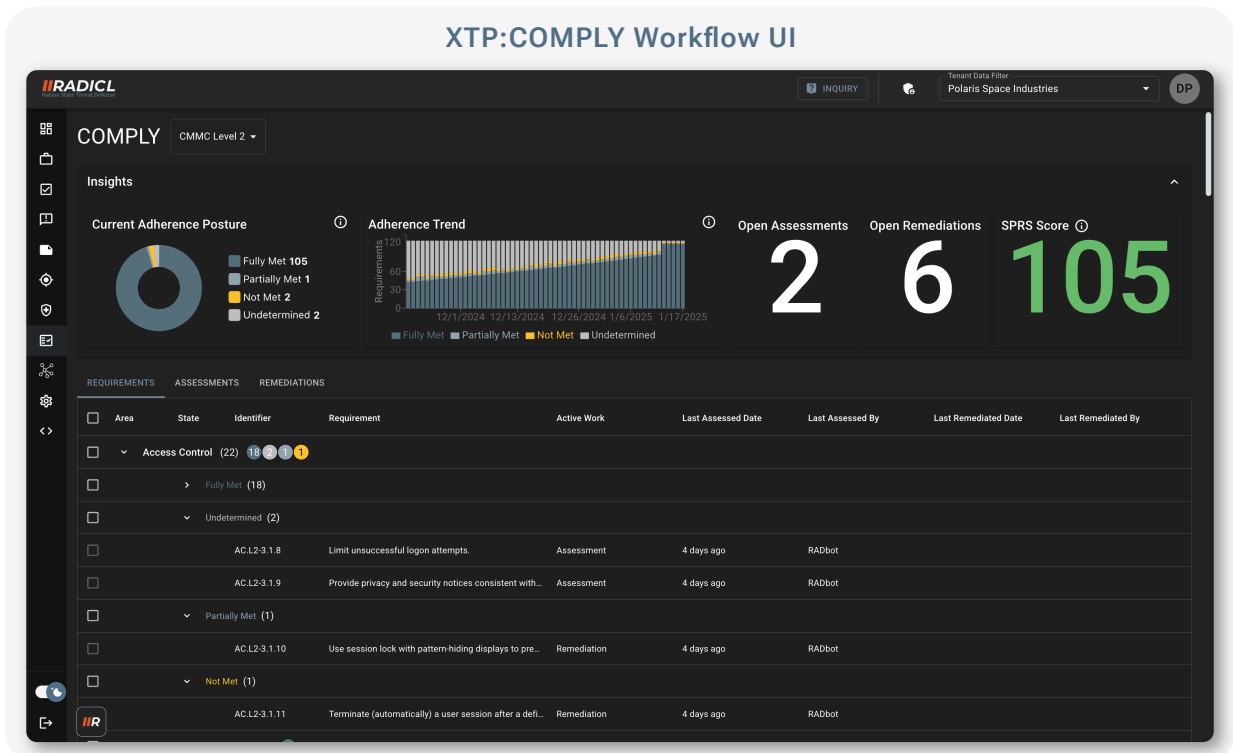

RADICL HELPS SIMPLIFY, ACCELERATE, AND REDUCE THE COST OF CMMC COMPLIANCE

WHY TRUST RADICL FOR YOUR CMMC COMPLIANCE JOURNEY?

- **ADVANCED THREAT PROTECTION:**
RADICL is an advanced cyberthreat protection company. We will ensure you are compliant AND keep you safe from motivated threats that seek to steal your data, disrupt your operations, or extort your money.
- **OUT-OF-THE-BOX COMPLIANCE:**
RADICL's advanced threat protection capabilities directly meet and support many compliance requirements. RADICL provides out-of-the-box support for up to 26 CMMC Level 2 requirements.
- **MANAGABLE SPEED:**
RADICL will offload and accelerate your CMMC journey. XTP:COMPLY drives a well-managed and reasonable pace to achieve CMMC Level 1 readiness in 90 days, Level 2 in 180.
- **COST EFFECTIVE:**
With RADICL XTP you receive advanced threat protection and guided compliance at a reasonable price point. Don't pay more for less.
- **SECURE EVIDENCE CAPTURE**
Evidence from assessments and remediations is securely captured and stored in the XTP Platform. Evidence is centralized, safe, and easily accessible for you and your auditors.
- **EXECUTIVE TRANSPARENCY:**
Your CEO and senior leadership will have direct and easy visibility into your compliance posture, ensuring they are in the know, and can easily lend a helping hand when needed.
- **AUTOMATIC AND TRUSTWORTHY SPRS SCORE:**
Your NIST SP 800-171 SPRS score will be automatically calculated and updated as you improve your compliance posture. Submit your score with confidence and ease.
