

A-LIGN

RADICL™

Protecting and simplifying your CMMC compliance audit journey

Why Choose RADICL and A-LIGN?

RADICL provides compliance consulting services that make daunting compliance mandates manageable. Experts guide clients through CMMC and NIST 800-171 requirements using risk-prioritized workflows, documentation support, real-time compliance dashboards, full audit trail and evidence capture, and SPRS score automation. In addition, RADICL's Cybersecurity-as-a-Service (CSaaS) platform addresses 29 of the 110 CMMC controls through its integrated technical security capabilities.

Together with A-LIGN, we offer a turnkey end to end CMMC solution for the DIB, combining RADICL's managed operations and readiness consulting with A-LIGN's assessment service.

Integrated Methodology: RADICL provides the expertise and technical backbone through its Cybersecurity-as-a-Service (CSaaS) model:

- **AI-Powered Virtual SOC:** 24/7 threat monitoring, incident response, and vulnerability management
- **Managed Compliance Adherence:** Expert guidance through frameworks like CMMC, NIST 800-171, and more
- **Managed Security Awareness:** Modern, DIB-focused training and phishing simulations
- **Managed Attack Surface:** continuously identifies, prioritizes, and verifies remediation of endpoint and server vulnerabilities

This foundation ensures that clients are secure and compliant. Once RADICL has completed compliance readiness services, A-LIGN steps in to conduct formal assessments, including SOC 2, ISO 27001, and CMMC audits

Recognized Expertise and Technology

#1 SOC 2 issuer globally with 5,000+ reports issued

Trusted by 4,000+ clients with **96% satisfaction** and 24-hour response time

Completed 16,000+ audits across SOC, ISO, HITRUST, PCI, and FedRAMP

Industry-leading expertise:

- SOC: #1 SOC 2 issuer with 5k+ reports
- ISO: 2k+ ISO assessments
- HITRUST: 10+ years of experience, 100% success rate
- FedRAMP: 250+ assessments, 100% PMO acceptance

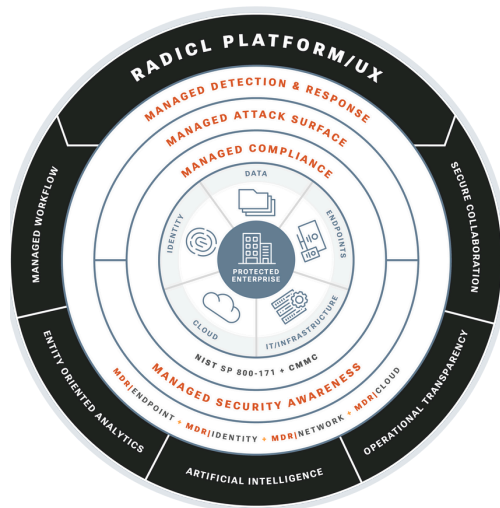

White glove compliance consulting with experts who can demystify the CMMC journey

Military grade threat protection that is battle-tested and trusted by DIB innovators

- Products cover 29 of the hardest to implement CMMC controls
- AI-augmented virtual SOC delivers 90% reduction in noisy alerts
- 150+ custom analytics rules running in every customer environment
- 12 original training modules covering CMMC security awareness objectives, plus CUI data handling guidance
- Nearly 50,000 software vulnerabilities identified and driven to resolution

RADICL Cybersecurity-as-a-Service (CSaaS) brings SMBs the protection they deserve and need, cost-effectively and quickly. Our proprietary AI-augmented Extended Threat Protection (XTP) platform powers a virtual Security Operations Center (vSOC) that allows our team to become your team — driving and delivering advanced security and regulatory compliance on a daily basis.

Benefits:

- **Materially Reduced Cyber Incident Risk:** Our comprehensive offering drives differentiated threat visibility across the entire IT infrastructure. Our platform, combined with the expertise of our virtual SOC, materially reduces the risk of experiencing a high-cost incident.
- **IT Resource Optimization:** We quickly become your expert cybersecurity and compliance team. This allows your IT team/MSP to focus on serving the productivity and operational needs of the business, accelerating business outcomes while reducing cybersecurity risk.
- **Reduced Cyber Insurance:** Premiums Insurance providers are increasingly requiring mature cybersecurity capabilities to obtain insurance or receive a reduced premium. With RADICL CSaaS, you can quickly offload the hardest and costliest requirements and optimize your cybersecurity insurance options.
- **Regulatory Compliance Adherence:** Most industries are bound to a regulatory compliance requirement. RADICL CSaaS directly addresses the costliest and hardest to achieve requirements. We also become your daily compliance operations team, helping ensure 100% continuous compliance.
- **Consolidated & Predictable Spend:** Consolidate contracts and costs and reduce your cybersecurity vendor and service sprawl. With RADICL CSaaS, you'll realize predictable subscription pricing and have a single entity to hold accountable for ensuring your advanced cybersecurity program needs are being met.

A-LIGN is a technology-enabled security and compliance partner trusted by more than 4,000 global organizations to mitigate cybersecurity risks. A-LIGN was founded in 2009 to help companies like yours navigate the complexities of cybersecurity and compliance by offering customized solutions that align specifically with each organization's unique goals and objectives. From your first audit to a strategic compliance program, A-LIGN delivers the highest quality, most efficient experience – without breaking your budget or timeline.
