

CYBERSECURITY-AS-A-SERVICE BUILT FOR GROWING BUSINESSES

Businesses of all sizes face relentless attacks from threat actors who seek to steal intellectual property and disrupt their operations. Whether in the Defense Industrial Base (DIB) or doing business with other government agencies, these companies are high-value targets for motivated ransomware gangs and other cybercriminals.

RADICL revolutionizes cybersecurity by paving a rapid and easy path to **enterprise-grade cyberthreat protection at a price point built for growing organizations**. The RADICL Platform delivers 24/7 protection they deserve and need, cost-effectively and quickly implemented. Our proprietary AI-augmented platform powers a Virtual Security Operations Center (vSOC) that allows our team to become your security team, driving and delivering advanced security and regulatory compliance on an ongoing basis.

In addition, we also drive a proactive and continuous path to **compliance assurance for frameworks such as NIST SP 800-171 R2 and NIST CSF**, ensuring your company passes its assessment and maintains a strong IT security foundation.

BENEFITS

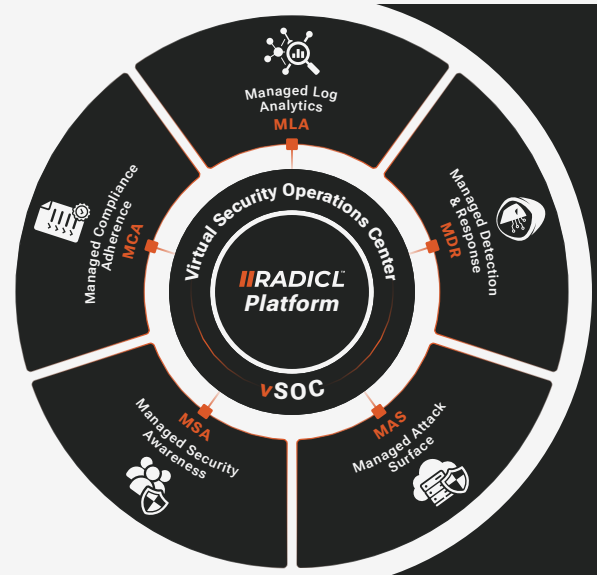

- ✓ **Materially Reduced Cyber Incident Risk:** Our comprehensive offering drives differentiated threat visibility across the entire IT infrastructure. Our platform, combined with our vSOC's expert staff, materially reduces the risk of experiencing a high-cost and disruptive incident.
- ✓ **IT Resource Optimization:** We quickly become your expert cybersecurity and compliance team without requiring you to stand up multiple tools or increase headcount. This allows your IT team or MSP to focus on serving the productivity and operational needs of the business.
- ✓ **Reduced Cyber Insurance Premiums:** Insurance providers increasingly require mature cybersecurity capabilities to be in place to obtain insurance or receive a reduced premium. With RADICL CSaaS, you can quickly offload the hardest and costliest requirements and optimize your cybersecurity insurance options.
- ✓ **Regulatory Compliance Adherence:** Most industries are bound to a regulatory compliance framework and the RADICL Platform was built to directly address the costliest and hardest-to-achieve requirements. We become your daily compliance operations team, helping to ensure 100% continuous compliance.
- ✓ **Predictable Spend:** Consolidate contracts and costs to reduce your cybersecurity vendor and service sprawl. With RADICL CSaaS, you'll enjoy predictable subscription pricing and have a single entity to hold accountable for ensuring your advanced cybersecurity program needs are being met.

PROTECT AGAINST

EXTENDED THREAT PROTECTION

- Threats are monitored 24/7
- Incidents are rapidly investigated and resolved
- Deeply embedded threats are hunted for and exposed
- The mobile perimeter is protected with modern technology
- IT infrastructure is less vulnerable to attack and compromise
- Employees are less likely to fall prey to phishing attacks

RADICL CSAAS SOLUTIONS

MANAGED DETECTION & RESPONSE (MDR)

Provides comprehensive threat protection with weekly threat hunts, continuous custom analytics, and 24/7 monitoring.

- Endpoint, identity, and infrastructure protection
- Novel and embedded threat detection
- 24/7 incident response and expert mitigation

MANAGED LOG ANALYTICS (MLA)

Gives enterprise SIEM power without the SIEM burden, featuring centralized log collection and an automated 1-year compliance archive.

- Unlimited log sources
- AI-assisted natural language search
- Continuous compliance with log collection

MANAGED ATTACK SURFACE (MAS)

Reduces cyber risk by continuously hardening IT infrastructure with continual expert guidance and closed-loop visibility.

- Proactive vulnerability management
- Expert-driven guided remediations
- Expedited response for critical vulnerabilities

MANAGED SECURITY AWARENESS (MSA)

Enhances cybersecurity hygiene and protects against social engineering threats through comprehensive employee training, phishing simulations, and customized content.

- Comprehensive security training
- Enhanced phishing resistance
- Continuous employee education

MANAGED COMPLIANCE ADHERENCE (MCA)

Helps organizations achieve regulatory compliance, according to frameworks like NIST SP 800-171 and CMMC, with full visibility into progress via our dashboard.

- Streamlined self-assessments
- Expert guided gap remediations
- Transparent compliance tracking

The RADICL Platform allows us to **quickly and seamlessly become your security and compliance team**. As your cybersecurity partner, we aim to deliver **full transparency and a sense of calm confidence** without any unwelcome surprises.

You focus on growing a profitable business. We'll keep you secure and compliant.
